

Craft Class Project Make – Easter Basket using 6x6” DSP

Instructions:

1. Choose a piece of 6x6" DSP or cardstock for your basket base
2. You will also need a strip of DSP or cardstock measuring 1" x 6" for the handle - utilise those scraps and get creative lol!
3. Some scrap DSP to make the layering section.
4. Score every side at 2" and burnish well
5. On two opposite sides, cut up, vertically, both score lines to first horizontal score line
6. If you wish, round all four corners of your DSP
7. Take a side and adhere centrally to middle square, immediately do the same to the other side making sure they line up before that glue dries.
8. Repeat on other side of basket.
9. Using your strip of DSP adhere to your basket.
10. Punch and layer your three sentiment circles and stamp with sentiment of choice.
11. Add a bow to your handle to finish your project... oh wait
12. Fill it up with goodies then take a photo of your creation (share with me on social media if you have time:))
